

NOBODY Operation Proposal

Proposal ID: P5

Proposal Status: Approved

Proposal Name: Sevenfoureleven Protocol Proposal

Proposed By: 7411

Proposal Explanation

This Proposal aims to make sure that everyone working for NOBODY has the means to have the amount of privacy that they wish to have. The Sevenfoureleven Protocol would let NOBODY employees work under either a nickname, or an alternate callsign, with real name details only required in internal documents. This way, transparency does not disrespect privacy.

Callsigns and/or nicknames need to be approved directly by 7411. The Protocol only applies to actual employees, not volunteers of any kind, who may work under any kind of name they wish to.

Proposal Justification [IF APPROVED]

Proposal was approved by 7411 under the justification:
Privacy.

In this modern world, nothing could be worth more than privacy. I personally don't wish to be famous; I want my work to be famous, but not myself, so the same should apply to other people working for NOBODY in case they wish so.

Proposal Rejection Reasoning [IF REJECTED]
